2D. WEB – DOWNLOAD DATA

NOTE: Preferred web browser for optimal performance is **Google Chrome** https://catinspectweb.cat.com

Download Data allows users to obtain a large data file for the following reports:
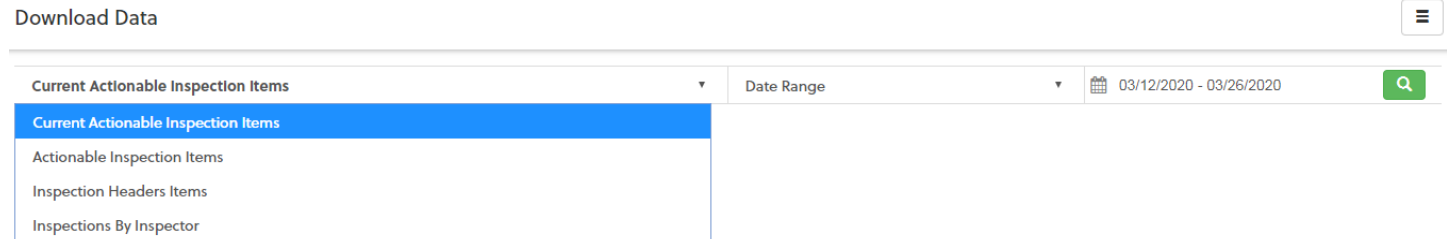

- **Current Actionable Inspection Items** – provides inspections that have question whose response are action or monitor only
- **Actionable Inspection Items** – provides inspections that have question whose response are action or monitor only
- **Inspection Headers Items** – provides inspections with header level information
- **Inspections by Inspector**

Downloads are available via custom date range up to 90-days.

The Excel reports that return require data cleanup and manipulation to be viewer friendly, as it pulls in all inspections meeting the report criteria within the timeframe selected.
