# SINGLE LIFE CUTTING EDGES

Here to help make jobs easier.

With Cat single life cutting edges, you'll be able to curb extra maintenance and operating costs. How? Our latest cutting edges replace double-bevel edge tools on 950 to 980 medium wheel loader buckets.

The single-bevel design eliminates the need to monitor wear and flip the edge. With increased thickness on the single life cutting edge, you'll get the same trusted performance for every high-impact and abrasive application you can dream up. Fewer overall pieces and hardware mean less time spent on maintenance and more money in your pocket.
